

# Transport Pocket

for PWS 2.3 and PWS 2.3 PLUS

The transport pocket has been especially designed for the portable working standards PWS 2.3 and PWS 2.3 PLUS and allows transporting the standards well protected and comfortable to the use on site.

The multifunctional applicable transport pocket allows usage of working standards under different conditions:

- Transport of the device by shoulder belt
- Hanging position in front of the operator and enabled free hands
- Shoulder belt could be used to place the device on open door of meter box
- Positioning support on rear side allows to place the device on a working desk
- Protection against damage

## Technical data

Material:

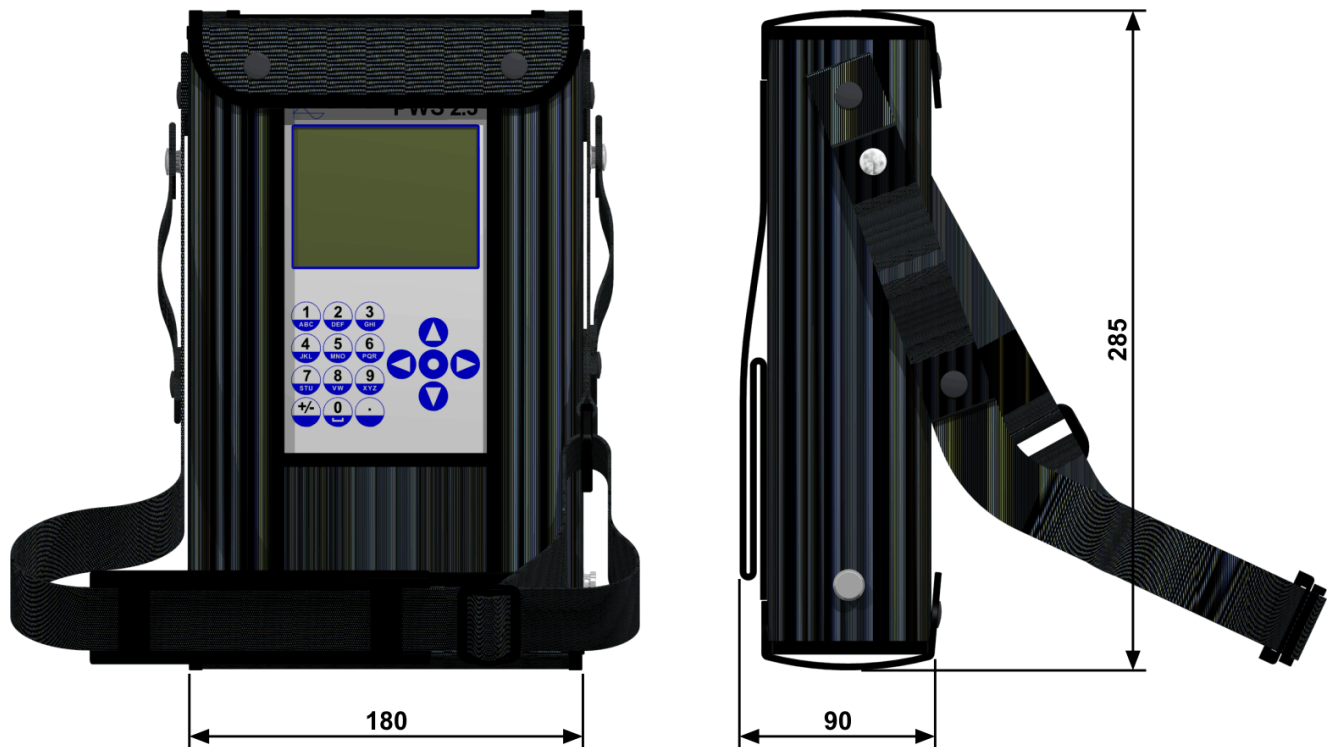

Robust tissue
